

## Acknowledgements

I would like to thank the members of my proposal and oral defense committee, Professor Chen Lu-hu, Professor Eugene Kuan and Professor Keng Shu. To Professor Keng, as my thesis advisor, I owe even more thanks for his interest, patience, invaluable criticism and support. I would also like to thank the staff of IMTS, especially Carol Hsieh, for going above and beyond the call of duty in helping me to complete this project. Finally I would like to thank my wife, Kathryn, for her unstinting encouragement, my sister-in-law, Dr. Cheng Jur-shan, for the trouble I have caused her and my wife's family, without whose support none of this would be possible
